

DRAGONFLY: A HELPFUL INSECT

- 1- Dragonflies are water insects that help us by feeding on pesky bugs like small flies and mosquitoes.**
- 2- Here's how to make one...**
- 3- Take a plain clothespin and paint it brown , green or blue..the color of dragonflies. Let it dry .**
- 4- Cut out 4 thin, oval wings about 4 inches long .**
- 5- Glue 2 wings on each side of the clothespin right behind the head. Let the glue dry .**
- 6-Glue a button on each side of the head .**
- 7- Dragonfly eyes are very large to help them find their prey.**
- 8- Look for these beautiful insects near ponds and lakes.**
