

MAKE A FISH MOBILE

1-Take a wire clothes hanger and curve the hook on top into a loop.

2-Take some string and pull it through the loop and tie it into another round loop.

3-Draw a simple fish shape about 4-5 inches long on colored construction paper and cut it out.

4- Trace 2 more fish just like it using different colors and cut them out.

5- Color or decorate the fish with markers.

6- Using a needle and thread attach different lengths of thread through the top of each fish.

7- Attach one fish at each end of the hanger and one exactly in the middle using tiny pieces of scotch tape.

8- Hang it where it can turn freely.

9- watch the fish "swim " in the air .
